

O. Sree Chakra Reddy

LLM Engineer — Generative AI — Agentic AI — RAG Systems
linkedin.com/in/sreechakrareddy — github.com/sreechakra180
IIT Madras – Data Science — RGUKT R.K. Valley – ECE + AI/ML

EDUCATION

IIT Madras	2023 – 2027
B.Sc. in Data Science	CGPA: 7.55
RGUKT R.K. Valley	2021 – 2027
B.Tech in ECE & AI/ML	CGPA: 8.0

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, C
GenAI: Transformers, RAG, LLM APIs, Prompt Engineering, Embeddings, Vector Search
Agentic AI: Multi-step reasoning, tool orchestration, function calling, workflow agents
Frameworks: LangChain, OpenAI APIs, HuggingFace, FastAPI, PyTorch
Cloud/DevOps: Docker, Git, REST APIs, AWS basics, deployment pipelines
Engineering: Testing, code structure, documentation, version control

EXPERIENCE

Generative AI Engineer — Independent Projects 2024 – Present

- Built production-style RAG systems integrating embeddings, vector retrieval, and LLM-based reasoning.
- Developed agentic workflows using tool-based orchestration, multi-step reasoning, and API integrations.
- Implemented backend AI services with FastAPI, REST endpoints, and modular Python codebases.
- Deployed lightweight LLM pipelines with Docker and cloud-ready service structures.

SELECTED PROJECTS

Multi-Agent Research Assistant

- Built tool-using autonomous agents for search, summarization, reasoning, and report generation.
- Implemented planner-executor workflows with memory and retry mechanisms.

Enterprise RAG Knowledge System

- Developed document-aware RAG pipelines using chunking, embeddings, vector DB retrieval, and grounded LLM answers.
- Improved answer reliability with source-aware prompt chaining.

LLM Workflow Automation OS

- Designed multi-step agent pipelines for workflow automation, document parsing, and intelligent task execution.

Transformer-Based NLP Projects

- Worked on transformer fine-tuning for classification, summarization, and conversational systems.

ACHIEVEMENTS

- Built 60+ AI, GenAI, RAG, and systems engineering projects.
- Finalist in IIT Madras AI Hackathons.
- Strong interdisciplinary foundation across LLM systems, backend engineering, and production deployment.
