Education

IIT Madras	B.Sc. in Data Science CGPA: 7.55/10	2023 – 2027 Chennai, India
RGUKT R.K. Valley	B.Tech in ECE + Minor in AI/ML CGPA: 8.0/10	2021 – 2027 Idupulapaya, India

Technical Skills

- **Languages:** Python, SQL, JavaScript, C
- **AI/ML:** CNNs, Deep Learning, Computer Vision, Transfer Learning, Signal Monitoring
- **GenAI:** Transformers, RAG, LLM APIs, Prompt Engineering, Embeddings, Vector Search
- **Agentic AI:** Multi-step reasoning, tool orchestration, function calling, workflow agents
- **Frameworks:** PyTorch, TensorFlow, OpenCV, Scikit-learn, LangChain, HuggingFace, FastAPI
- **Edge Systems:** Embedded AI, Edge Inference, Real-Time Video Pipelines, Model Optimization

Professional Experience

Computer Vision & AI Engineer — Independent Projects 2024 – Present

- **Situation:** Built real-time facial analysis pipelines for driver safety applications.
- **Task:** Develop fatigue detection system using computer vision and AI.
- **Action:** Implemented blink-rate monitoring using OpenCV facial landmarks and temporal eye-state analysis.
- **Result:** Achieved 95% accuracy in fatigue detection with 40ms latency, enabling real-time alerts.

Generative AI Engineer — Independent Projects 2024 – Present

- **Situation:** Need for production-style RAG systems for enterprise knowledge management.
- **Task:** Build end-to-end RAG pipeline with embeddings, vector retrieval, and LLM reasoning.
- **Action:** Developed document-aware RAG pipelines using chunking, embeddings, vector DB retrieval, and grounded LLM answers.
- **Result:** Improved answer reliability by 60% and reduced hallucination rates to below 5%.

Founder & CEO — Sree Connect 2025 – Present

- **Situation:** Identified gap in accessible AI tools for small businesses.
- **Task:** Build and launch AI ecosystem with affordable tools for various sectors.
- **Action:** Led engineering, design, and deployment of 10+ AI products; mentored team of 5 developers.
- **Result:** Acquired 500+ active users across business, agriculture, and education sectors.

Key Projects

Smart Fatigue Detection System

- Built blink-rate monitoring system using OpenCV facial landmarks.
- Detected prolonged eye closure patterns with 92% accuracy.
- Reduced false positives by 45% through temporal analysis optimization.

Facial Stress Recognition CNN

- Trained CNN models for stress-related facial micro-expression classification.
- Achieved 88% accuracy on custom dataset of 10,000+ images.
- Implemented real-time inference with 50ms latency on edge devices.

Multi-Agent Research Assistant

- Built autonomous agents for search, summarization, and report generation.
- Implemented planner-executor workflows with memory and retry mechanisms.
- Reduced research time by 70% for academic papers and technical documents.

Soul Echo AI

- Developed emotion-aware GenAI conversation application.
- Integrated sentiment analysis and adaptive response generation.
- Achieved 4.2/5 user satisfaction rating from 1,000+ beta testers.

Achievements

- Built 60+ AI, GenAI, RAG, and computer vision projects
- Finalist in IIT Madras AI Hackathons (2023-2024)
- Top 1% performer in JPMorgan & Deloitte Forage Programs
- 25+ Certifications in ML, GenAI, TensorFlow, Deep Learning
- Esports Champion - IIT Madras Paradox (2024-25)
- Chess Elo 2030
