Education

IIT Madras	B.Sc. in Data Science CGPA: 7.55/10	2023 – 2027 Chennai, India
RGUKT R.K. Valley	B.Tech in ECE + Minor in AI/ML CGPA: 8.0/10	2021 – 2027 Idupulapaya, India

Technical Skills

- **Frontend:** HTML, CSS, JavaScript, React, TypeScript
- **Backend:** Python, FastAPI, Node.js, REST APIs
- **Databases:** SQL, PostgreSQL, MongoDB, Firebase, Supabase
- **AI/ML:** Deep Learning, NLP, LLMs, Computer Vision
- **DevOps:** Docker, Git, CI/CD, AWS, N8N
- **Frameworks:** TensorFlow, PyTorch, LangChain, HuggingFace

Professional Experience

Full-Stack AI Developer — Independent Projects 2024 – Present

- **Situation:** Need for end-to-end AI-powered applications with production deployment.
- **Task:** Develop complete full-stack applications integrating AI models with user interfaces.
- **Action:** Built comprehensive web applications with frontend, backend, and AI integration using modern tech stack.
- **Result:** Deployed 15+ production-ready applications serving 10,000+ users with 99.9% uptime.

Founder & CEO — Sree Connect 2025 – Present

- **Situation:** Identified market gap for accessible AI tools for small businesses.
- **Task:** Lead product development, engineering, and business strategy.
- **Action:** Built and led team of 8 developers; launched 10+ AI products across multiple sectors.
- **Result:** Achieved 500+ active users and 15% month-over-month growth.

Automation Engineer — Independent Projects 2024 – Present

- **Situation:** Manual processes causing inefficiency in various workflows.
- **Task:** Develop automation systems to streamline repetitive tasks.
- **Action:** Created automation OS with 500k+ lines of automation code integrating multiple APIs.
- **Result:** Reduced manual work by 80% and saved 200+ hours/month across various processes.

Key Projects

Sree Connect AI Tool Suite

- Developed comprehensive AI platform with 10+ micro-SaaS tools.
- Integrated LLMs, computer vision, and automation workflows.
- Achieved 4.5/5 user satisfaction rating from 300+ beta testers.

Agri-Rental Platform for Farmers

- Built full-stack platform connecting farmers with equipment rental services.
- Implemented geolocation, payment processing, and real-time chat.
- Onboarded 50+ farmers and 20+ equipment owners in pilot phase.

Low-Code ML Pipeline Builder

- Created drag-and-drop interface for building ML pipelines.
- Integrated 15+ pre-built ML models and data transformation tools.
- Reduced ML development time by 70% for non-technical users.

Serverless ETL System

- Developed cloud-native ETL system using AWS Lambda and API Gateway.
- Processed 1TB+ data/month with auto-scaling and cost optimization.
- Reduced infrastructure costs by 60% compared to traditional servers.

AI Opponent for 2D Combat Game

- Built intelligent AI opponent using reinforcement learning.
- Implemented adaptive difficulty and strategy learning.
- Achieved 85% win rate against human players at highest difficulty.

Esports Analytics Dashboard

- Created real-time analytics platform for esports tournaments.
- Integrated live data feeds, player statistics, and predictive insights.
- Used by 500+ esports enthusiasts with 10,000+ monthly active users.

Achievements

- Built 60+ full-stack applications and AI systems
- Finalist in IIT Madras AI Hackathons (2023-2024)
- Top 1% performer in JPMorgan & Deloitte Forage Programs
- Esports Champion - IIT Madras Paradox (2024-25)
- Chess Elo 2030
- 25+ Certifications in Full-Stack Development, AI, and Cloud
